### HF Portable Antenna

**NEW** 

- Freq: 7/14/21/28/50MHz
- 20W SSB
- 1.55m long (max)
- Manual bandswitching
- Tuning peaked by adjustable whip
- 50 Ohm. PL-259 base
- Includes radial wire
- Can be changed to right angle
- Weight 660g

This is the antenna that features on Icom's own advertising brochure in conjunction with the IC-703. Covering 7MHz - 28MHz, it can be used with a wide range of transceivers for portable work. It has a standard PL-259 base, so can be mounted on any SO-239 base. The PL-259 can be changed to a right angle configuration and locked into position. This is particularly convenient for coming out of the back of the IC-703 or similar transceiver. Diamond also supply a pair of 5m radials that can be attached to provide a counterpoise - something that is normally essential for 1/4 wave vertical antenna operation.

**Order As RHM5 Diamond Portable Antenna**
